## Course Name: Gender-Neutral Design in Public Bathrooms

**Description:** Inclusive design is a win-win for customers and businesses. It shows the business supports the assumption that public spaces should be functional for all users no matter their age, health, or ability. The commitment to inclusivity includes promoting and respecting everyone’s right to choose a washroom appropriate for them regardless of their gender expression, gender identity, or biological sex. This course explores the benefits of gender-neutral discusses the sustainable, hygienic, functional, and distinctive design and material options for gender-neutral public bathrooms.

### Learning Objectives:

At the end of this program, participants will be able to:

1. Explain how a gender-neutral washroom can protect the safety of all users regardless of their gender identity, age, health, or mobility challenges
2. Analyze a variety of materials for restroom fixtures to determine what properties and design features make them sustainable, hygienic, and functional for all
3. Discuss the applicable laws and building codes that support and respect everyone’s right to access safe restroom facilities safe restroom facilities without fear of humiliation or harassment
4. Discuss washroom design strategies that will help to mitigate common concerns regarding safety and privacy for various users
5. Compare the advantages and disadvantages of gender-neutral single-user washrooms and gender-neutral multi-stall washrooms to determine the right design option for a specific application
